

# Scientific Applications of the Regional Climate Model Evaluation System (RCMES)

Paul C. Loikith, Duane E. Waliser, Chris Mattmann, Jinwon Kim, Huikyo Lee, Paul M. Ramirez, Andrew F. Hart, Cameron E. Goodale, Michael J. Joyce, Shakeh E. Khudikyan, Maziyar Boustani, Kim Whitehall, Alex Goodman, Jesslyn Whittell, and Paul Zimdars

WCRP VAMOS/CORDEX Workshop of Latin-America and Caribbean CORDEX  
Phase 1-South America  
September, 11-13, 2013  
Lima, Perú

Jet Propulsion Laboratory  
California Institute of Technology

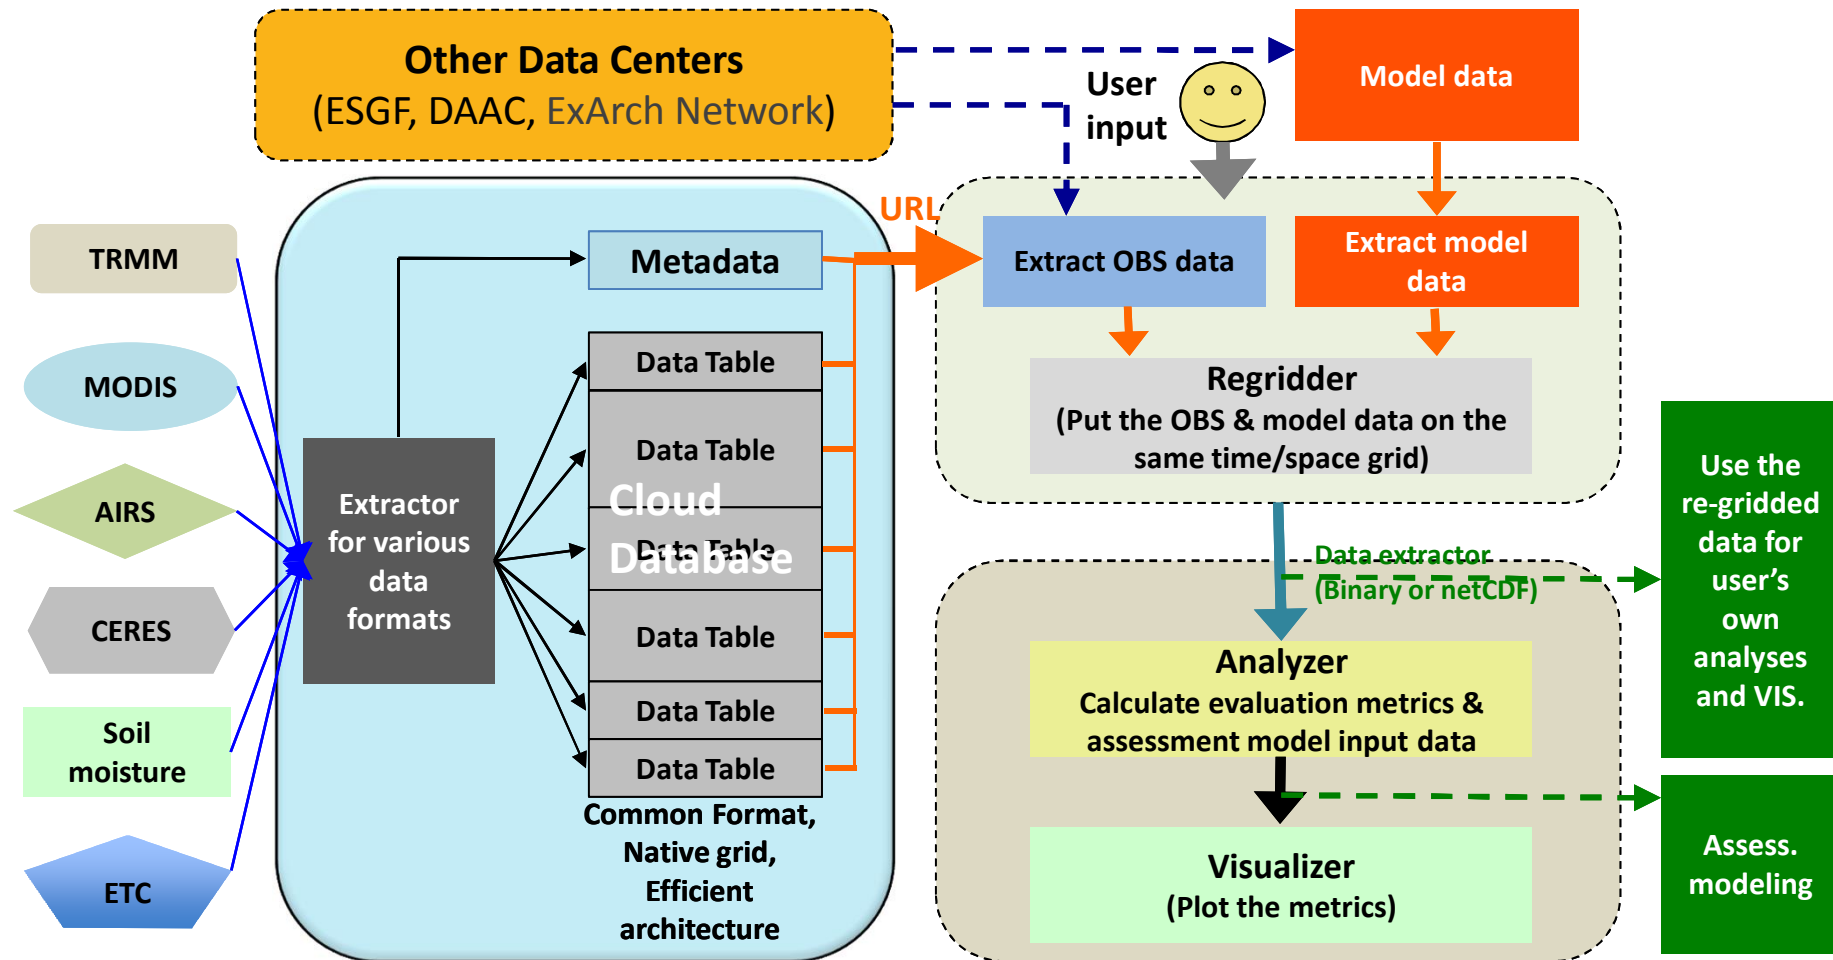

# The Regional Climate Model Evaluation System (RCMES)

- ” Joint collaboration: **JPL/NASA**, **UCLA**
- ” Designed to facilitate model evaluation and decision making
  - Provides access to numerous (NASA) observation datasets (RCMED)
  - Python-based built-in toolkit (RCMET) has regridding capabilities and calculates and visualizes several common metrics (RMSE, Bias)
- ” Initial target: CORDEX

# RCMES Architecture

(<http://rcmes.jpl.nasa.gov>; Powered by *Apache Open Climate Workbench*)

## Raw Data:

Various sources,  
formats,  
Resolutions,  
Coverage

## RCMED

(Regional Climate Model Evaluation Database)  
A large scalable database to store data from variety  
of sources in a common format

## RCMET

(Regional Climate Model Evaluation Tool)  
A library of code for extracting data from  
RCMED and model and for calculating  
evaluation metrics

Jet Propulsion Laboratory  
California Institute of Technology

# Meet the RCMES Team

## Science Team:

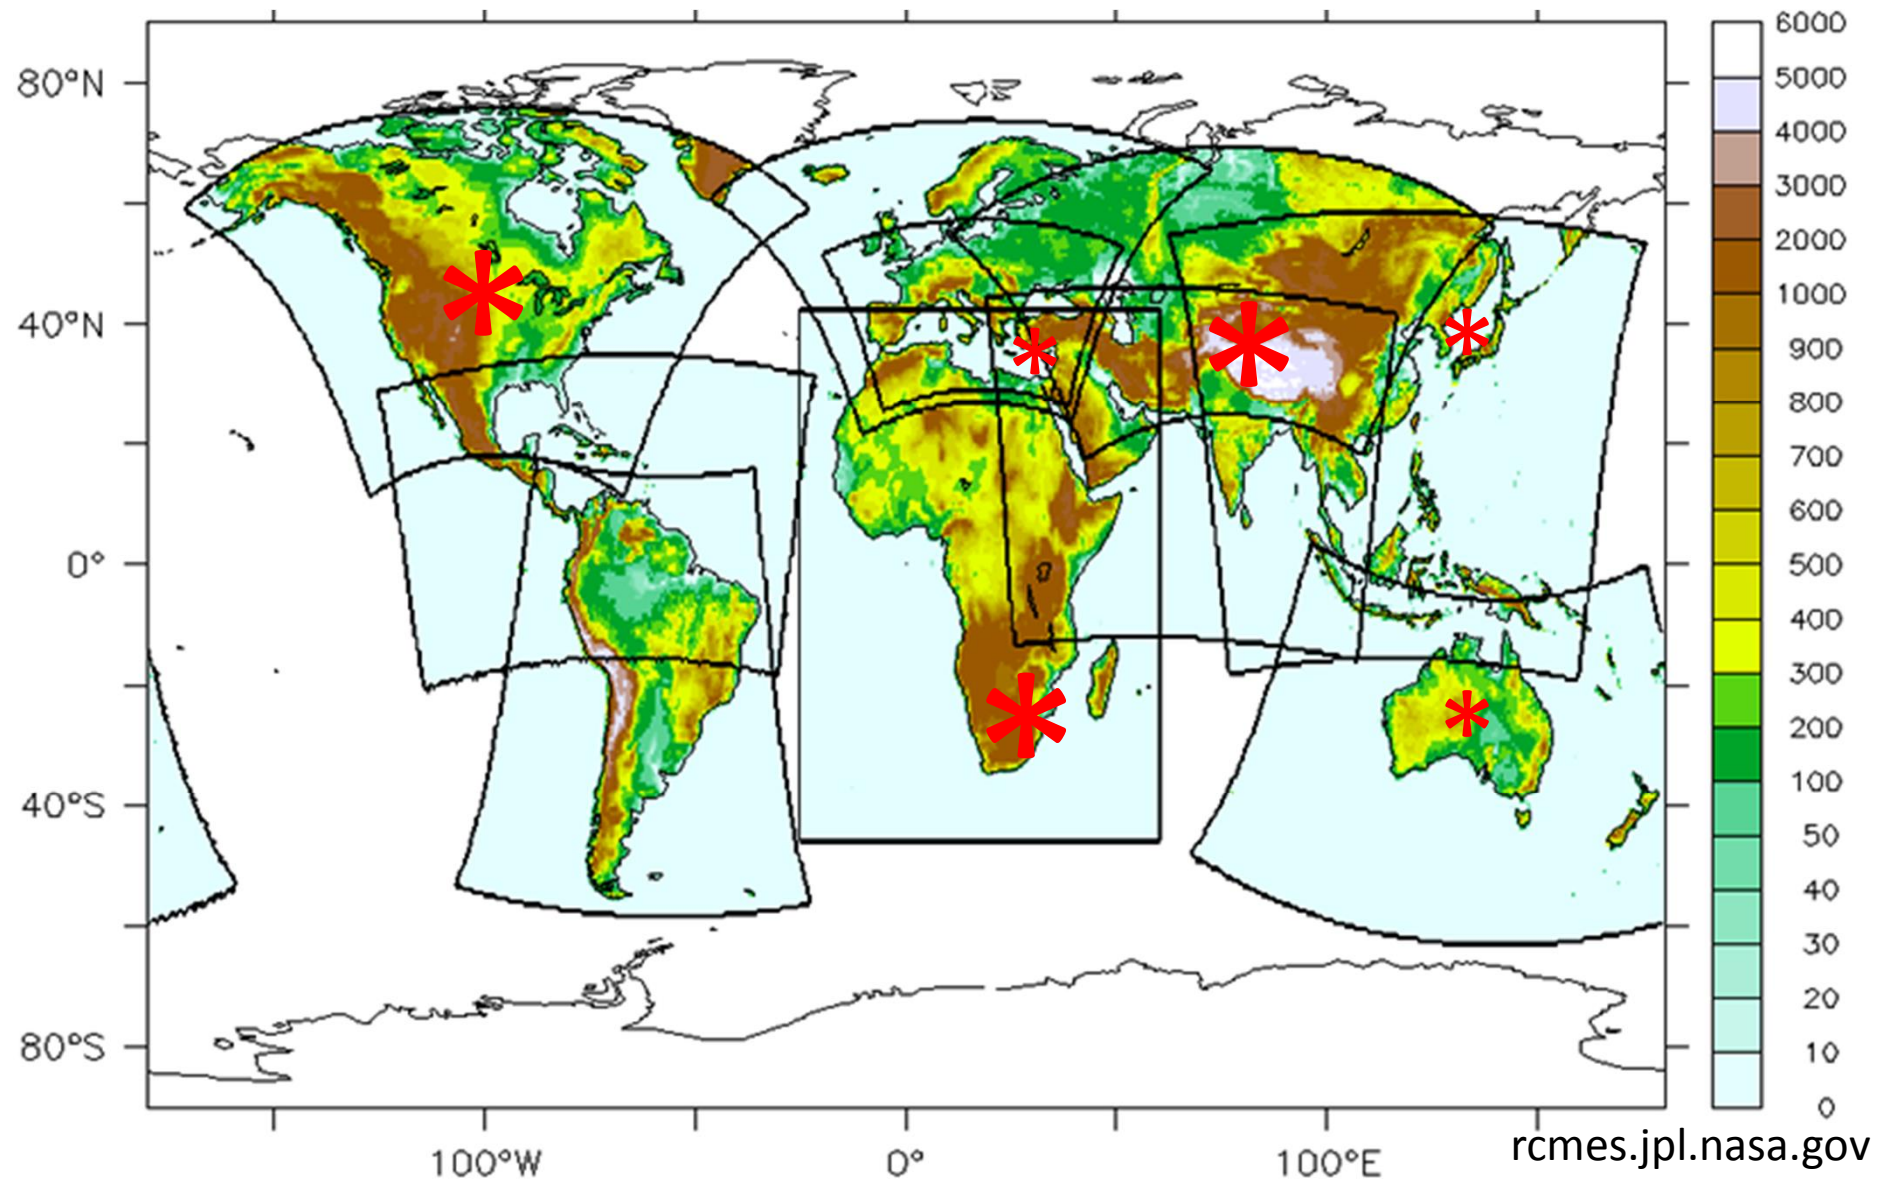

**Duane Waliser (PI, JPL/Caltech, UCLA)**, Jinwon Kim (UCLA),  
Paul Loikith (JPL/Caltech), Huikyo Lee (JPL/Caltech),  
Kim Whitehall (Howard University)

## IT Team:

**Chris Mattmann (PI, JPL/Caltech, UCLA)**, Paul Ramirez (JPL/Caltech),  
Cameron Goodale (JPL/Caltech), Michael Joyce (JPL/Caltech),  
Maziyar Boustani (JPL/Caltech), Andrew Hart (JPL/Caltech),  
Shakeh Khudikyan (JPL/Caltech),  
Jesslyn Whittel (University of California, Berkeley),  
Alex Goodman (Colorado State University)

## Active CORDEX Collaborations

# Observations

## Remote Sensing, In Situ, Reanalysis

- “ Temperature (AIRS, CRU, UDEL)
- “ Precipitation (TRMM, CRU, UDEL, CPC, GPCP)
- “ Radiation/clouds (CERES, MODIS)
- “ Sea surface height (AVISO)
- “ Sea surface temperature (AMSRE)
- “ Winds (QuikSCAT)
- “ Multivariate reanalysis (MERRA, NARR, NLDAS ERA-Interim)
- “ More to come...

Please see poster by Kim  
Whitehall *today* for further  
details

## RCMET Evaluation UI

See youtube video:  
<http://rcmes.jpl.nasa.gov/training/videos>

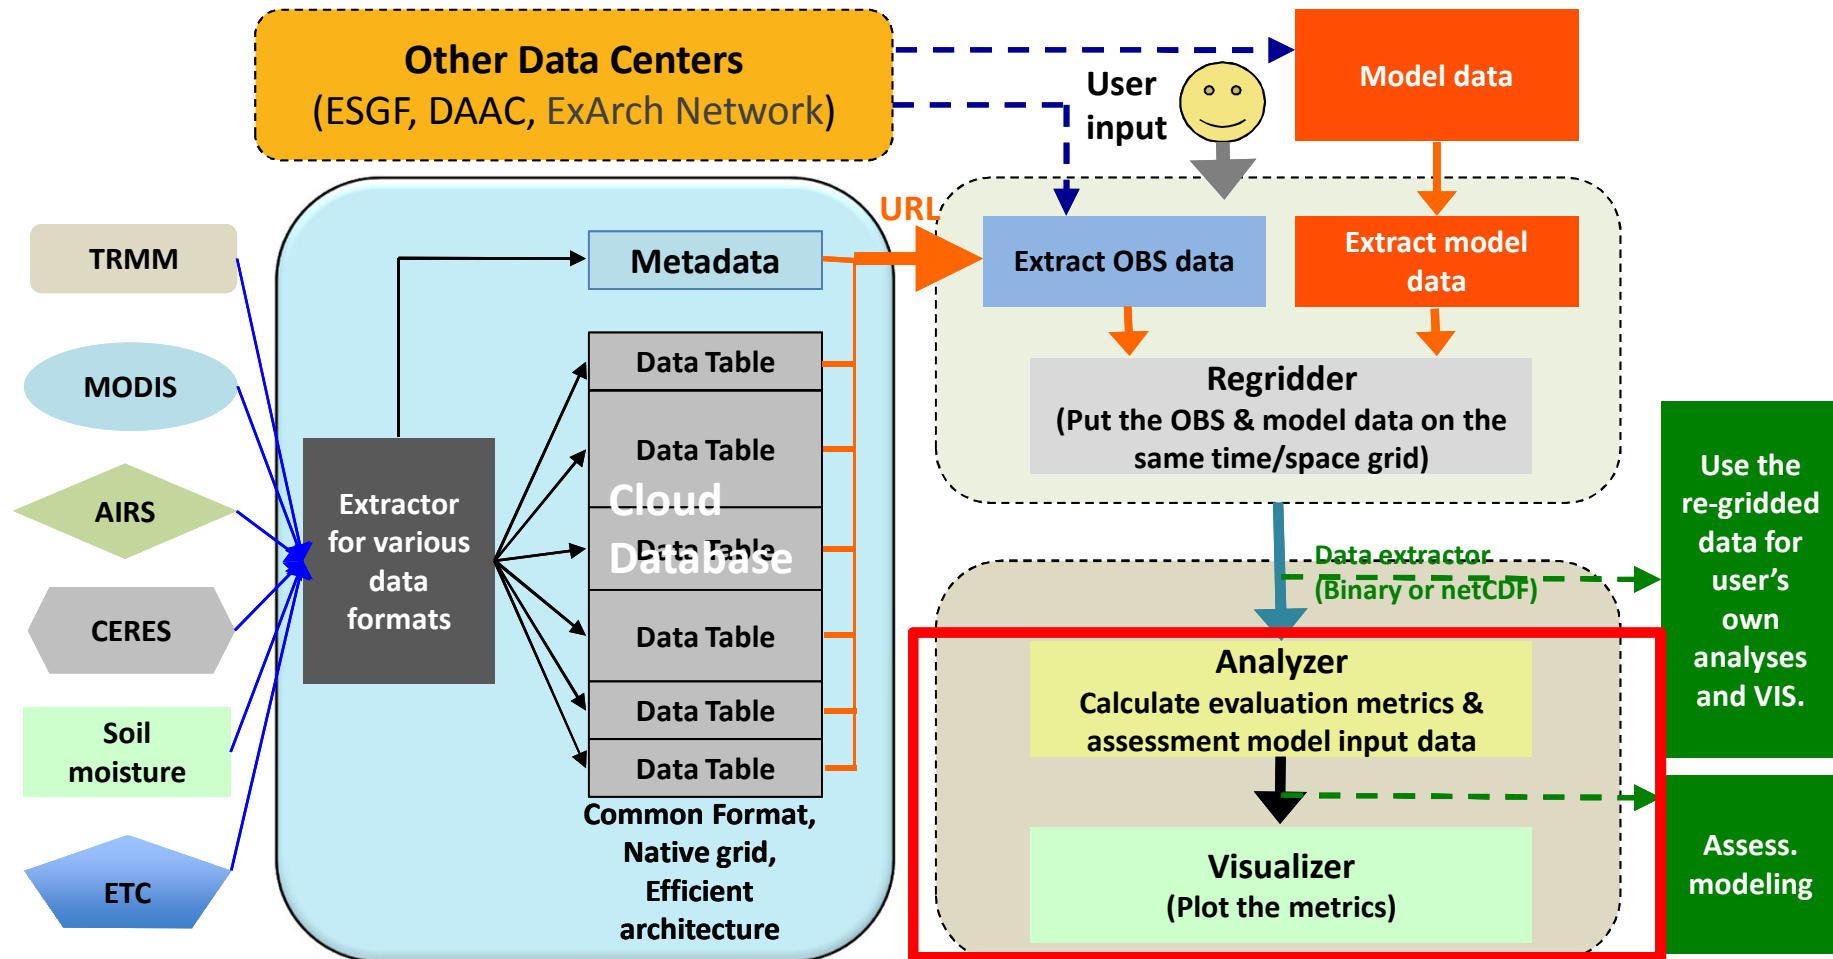

Start Date	<input type="text"/>	End Date	<input type="text"/>	<div>Once users have selected models and/or observations to work with in this area we will display auto-detected model Lat/Long/Time parameters that overlap and will allow the user to edit the values.</div> <div>Select Dataset</div>
North	<input type="text"/>	East	<input type="text"/>	
South	<input type="text"/>	West	<input type="text"/>

A library of code for extracting data from  
RCMED and model and for calculating  
evaluation metrics

## NARCCAP Cloud-precipitation-radiation relationship

Lee, H., J. Kim, D. E. Waliser, P. C. Loikith, C. A. Mattmann, and S. McGinnis, Evaluation of simulation fidelity for precipitation, cloud fraction and insolation in the North America Regional Climate Change Assessment Program (NARCCAP), *submitted to J. Geophys. Res.*, August, 2013.

## Evaluation of NARCCAP Temperature PDFs and Extremes

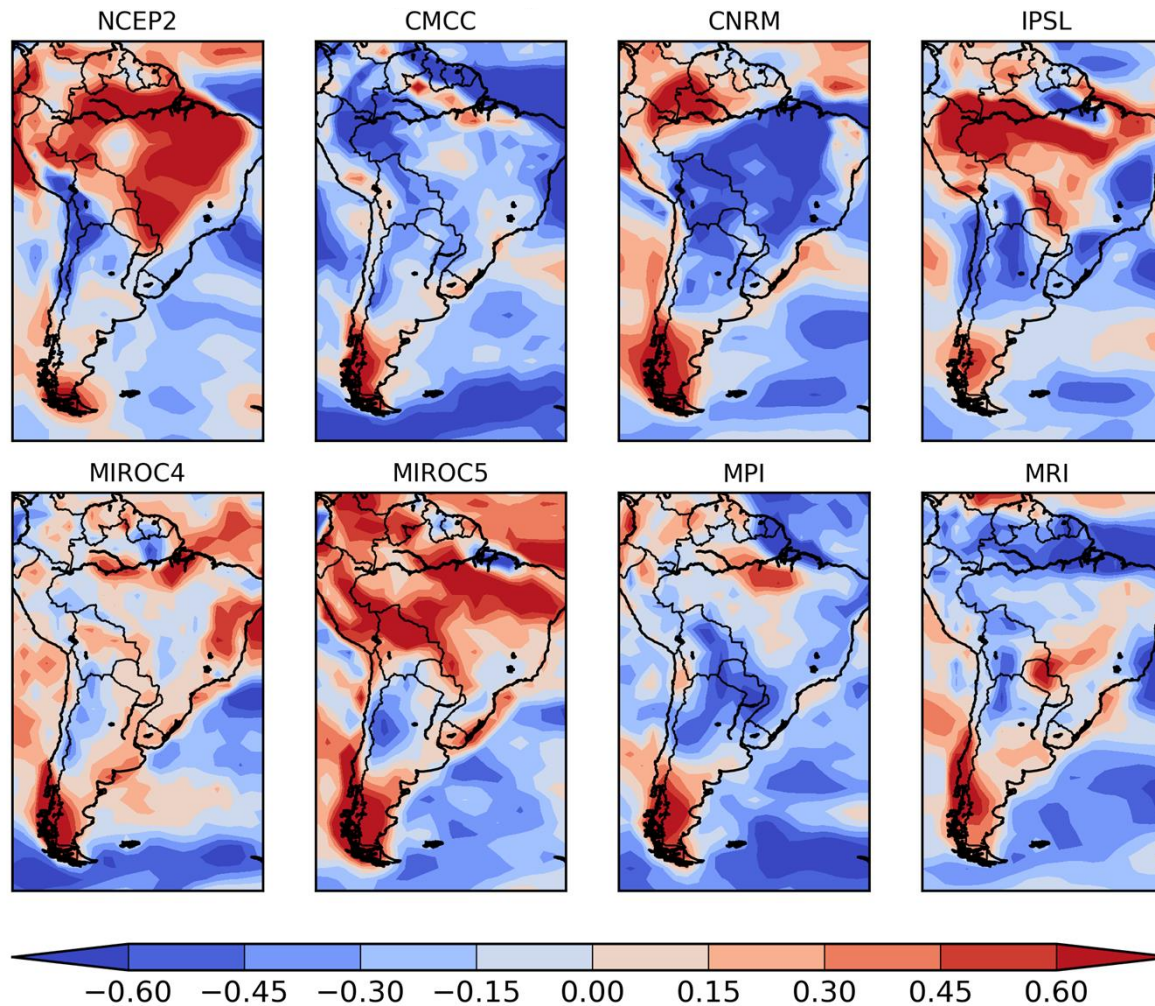

Loikith, P. C., D. E. Waliser, J. Kim, H. Lee, B. R. Lintner, J. D. Neelin, S. McGinnis, C. Mattmann, and L. O. Mearns, Surface Temperature Probability Distributions in the NARCCAP Hindcast Experiment: Evaluation Methodology, Metrics and Results, *submitted to J. Climate*, July 2013.

## Skewness of January Surface Temperature

- “ RCMES allows for regional analysis of global models
- “ Possible to compare CMIP5 simulations to CORDEX downscaled model simulations
- “ Results show substantial model-reanalysis disagreement in daily temperature skewness
- “ Suggestive of improper simulation of temperature extremes where disagreement is high

# Future Direction

- “ Observations and metrics continue to be added to RCMES
  - . Community can contribute to RCEMT via the Apache Open Climate Workbench (<http://climate.incubator.apache.org/>)
- “ Regional Evaluation of CMIP5, including linkage to ESGF
- “ Developing new and novel evaluation metrics for the evaluation
  - . Large-scale meteorological patterns associated with extremes
  - . Using k-means clustering to evaluate temperature PDFs
  - . Develop optimal multi-model ensemble techniques
- “ Expanding user community and fostering new collaborations within CORDEX

Please see poster by Kim  
Whitehall *today* for further  
details

## How do I get RCMES?

- ” General information: [rcmes.jpl.nasa.gov](http://rcmes.jpl.nasa.gov)
- ” Download RCMES virtual machine
  - [rcmes.jpl.nasa.gov/training/downloads](http://rcmes.jpl.nasa.gov/training/downloads)
- ” Open source at Apache Open Climate Workbench
  - <http://climate.incubator.apache.org/>
- ” General inquiries please email: [rcmes-general@jpl.nasa.gov](mailto:rcmes-general@jpl.nasa.gov)

Please see poster by Kim  
Whitehall *today* for further  
details
